组件画廊

这个画板把产品无关的 foundation catalog 和 OpenBit 语义 preset 层分开呈现。Foundation 定义可复用积木，Preset 描述业务级编排。

Foundation Catalog

content.badge

Compact semantic badge.

默认 激活

source: packages/ui-foundation/catalog/content.badge.json

content.heading

Semantic title text.

标题示例

source: packages/ui-foundation/catalog/content.heading.json

content.label

Compact label text for metadata.

标签 / 元数据

source: packages/ui-foundation/catalog/content.label.json

content.text

Body copy with tone and line constraints.

正文保持描述性与中性，语气由语义 prop 决定，而不是零散样式。

source: packages/ui-foundation/catalog/content.text.json

data.list-item

Semantic list row for tasks, runs, and participants.

渲染器适配器原型 进行中

把 kernel node 与 domain preset 翻译成可预览的输出结构。

source: packages/ui-foundation/catalog/data.list-item.json

data.metric

Small metric card for summary numbers.

74

任务数

11 个处理中

source: packages/ui-foundation/catalog/data.metric.json

layout.grid

Wrapping layout for cards and dense summary content.

卡片 A

卡片 B

卡片 C

source: packages/ui-foundation/catalog/layout.grid.json

layout.stack

Generic one-dimensional layout container.

纵向 / 横向抽象

Gap、Padding、对齐方式

主布局原语

source: packages/ui-foundation/catalog/layout.stack.json

surface.card

Surface container for grouped content.

卡片表面 surface.card

用于内容分组的中性容器，带统一边框与层次契约。

source: packages/ui-foundation/catalog/surface.card.json

OpenBit Presets

openbit.page-header

Project hero summary for an OpenBit project page.

Preset 根节点: surface.card

基于 foundation contract 的语义编排层。

source: packages/ui-domain-openbit/presets/openbit.page-header.json

openbit.participant-panel

Project participant list.

Preset 根节点: surface.card

基于 foundation contract 的语义编排层。

source: packages/ui-domain-openbit/presets/openbit.participant-panel.json

openbit.requirement-list

openbit.runtime-activity

Requirement status list.

Preset 根节点: surface.card

基于 foundation contract 的语义编排层。

source: packages/ui-domain-openbit/presets/openbit.requirement-list.json

Recent run activity list.

Preset 根节点: surface.card

基于 foundation contract 的语义编排层。

source: packages/ui-domain-openbit/presets/openbit.runtime-activity.json

openbit.summary-grid

Metric summary grid for counts and cost.

Preset 根节点: layout.grid

基于 foundation contract 的语义编排层。

source: packages/ui-domain-openbit/presets/openbit.summary-grid.json
